PART I

Item 1. Business

Background

VAALCO Energy, Inc., a Delaware corporation, is a Houston-based independent energy company principally engaged in the acquisition, exploration, development and production of crude oil and natural gas. As used herein, the terms "Company" and "VAALCO" mean VAALCO Energy, Inc. and its subsidiaries, unless the context otherwise requires. VAALCO owns producing properties and conducts exploration activities as operator of consortium internationally in the Philippines and Gabon. Through participation in a partnership with Hunt Oil Company, VAALCO has additional international interests in Argentina, Peru, Ethiopia, Ghana, Niger and Canada. Domestically, the Company has interests in the Texas Gulf Coast area.

On April 21, 1998 VAALCO consummated the acquisition of 1818 Oil Corp. in exchange for 10,000 shares of Convertible Preferred Stock, Series A. The Preferred Stock is convertible into 27.5 million shares of VAALCO, \$0.10 par value per share, Common Stock. As a result of the voting control 1818 Oil Corp.'s shareholder obtained in the transaction, the 1818 Oil Corp. acquisition has been accounted for as a reverse acquisition and 1818 Oil Corp. is the acquiring entity for accounting purposes. The assets of 1818 Oil Corp. at closing consisted of a 7.5% limited partnership interest in Hunt Overseas Exploration Company, L.P. ("Hunt") with book value of \$2.8 million and \$12.6 million in cash. The \$12.6 million of cash, which 1818 Oil Corp. had at the time of the acquisition, was pledged as cash collateral to secure a letter of credit payable to Hunt for cash calls associated with the partnership.

Hunt has entered into production sharing contracts and other arrangements that entitle it to explore for oil and gas, both onshore and offshore, on approximately 34 million acres in various countries, including Argentina, Peru, Ethiopia, Ghana, Niger and Canada. The general partner of Hunt is Hunt Overseas Operating Company, a subsidiary of Hunt Oil Company. Hunt explores for high risk, large reserve accumulations, generally targeting deposits that pre-drilling seismic and other data indicate to have potential reserves in excess of 100 MMBOE. To date, Hunt has not been successful in discovering commercial deposits of oil. As of the date of this filing, Hunt has drilled at least one dry hole on all of the concessions in the partnership, and is currently drilling a well in Niger. Pending the outcome of the well in Niger, Hunt will have spent substantially all of the funds committed to the partnership for exploration. Future drilling may be dependent upon the results of efforts to farm-out the properties.

Under the partnership agreement with Hunt, at December 31, 1999 the Company was obligated to contribute an estimated \$1.9 million to fund its share of the exploration costs of Hunt, \$1.7 million of which was subsequently funded as of the date of this filing. In addition, if Hunt discovers oil or gas deposits, the Company may be required to contribute an additional \$7.5 million to fund

appraisal costs. The partnership has no further call on funds from VAALCO beyond these two described obligations, and may only call the \$7.5 million in the event of an oil discovery. As of December 31, 1999 VAALCO had \$10.0 million in cash (\$8.3 million as of the date of this filing) in an escrow account to fund its obligations under the partnership agreement, which includes \$0.6 million of interest earned on the funds since they were placed in escrow, which is not pledged to the partnership. In the event any of the funds are not called upon at dissolution of the partnership, the amounts in escrow will be reclassified from funds in escrow to cash.

1818 Oil Corp.'s equity as of December 31, 1998 has been retroactively changed for the equivalent number of shares of VAALCO's Common Stock received in the transaction. The difference between the par value of the common stock of 1818 Oil Corp. and VAALCO has been credited to additional paid-in capital. In addition, at the time of the merger, the 1818 Fund II, L.P., a fund managed by Brown Brothers Harriman & Co. (the "1818 Fund") contributed the debt owed to it by 1818 Oil Corp. as additional paid-in capital to 1818 Oil Corp.

The income statement presented for the prior year periods is that of 1818 Oil Corp., not VAALCO the legal acquirer. The results of operations of VAALCO are included in the accompanying financial statements for the

1

periods subsequent to the date of the acquisition, March 31, 1998. Accordingly, a comparison of 1999 and 1998 may not be meaningful. The legal name of the registrant continues to be VAALCO Energy, Inc.

VAALCO's Philippine subsidiaries include Alcorn (Philippines) Inc., Alcorn (Production) Philippines Inc. and Altisima Energy, Inc. VAALCO's Gabon subsidiaries are VAALCO Gabon (Etame), Inc., VAALCO Production (Gabon), Inc. and VAALCO Energy (Gabon), Inc. VAALCO Energy (USA), Inc. holds interests in certain properties located in the United States.

#### Recent Developments

In January 1999, the Company completed the drilling of the Etame 2V delineation well on its concession offshore Gabon. The well logged oil pay in the Gamba Sandstone, however, the reservoir was encountered at a lower depth than expected. The well was not tested. During the second quarter of 1999, a seismic reprocessing effort was commenced to better delineate the Gamba reservoir which lies below a layer of salt. In February 2000, the Company completed the seismic reprocessing activities and has recommended to the consortium a third drilling location. At least one delineation well is planned for the year 2000.

During February 1999, Hunt Oil Company drilled a 4,500 foot test on its Rio Belgrano block in Argentina. The well did not encounter any commercial hydrocarbons and was abandoned. The Company had a 7.5% interest in the well.

In November 1999, Hunt mobilized a semi-submersible drilling rig to Ghana to drill an exploration well offshore Ghana. The well targeted a large turbidite structure at a location in 3,000 feet of water depth. The well was plugged and abandoned after encountering non-commercial oil shows in February 2000.

Hunt also mobilized a land rig in November 1999 to Niger from Algeria, to drill three exploration wells on prospects on the partnership's concession in Niger. The wells will test three separate structures, which were defined through a seismic campaign undertaken in 1996. Several additional structures were also delineated by the seismic campaign, and a decision to drill these structures will be based upon the results of the three exploration wells. As of the date of this filing, two of the wells had been drilled and encountered significant sand accumulations, but no commercial hydrocarbons. The third well is currently being drilled as of the date of this report.

VAALCO's share of the costs of the well offshore Ghana and the three wells in Niger will be approximately \$4.0 million, \$2.3 million of which was funded as of December 31, 1999. In February 2000, a payment was made to the partnership of approximately \$1.7 million to fund the balance of the cost of the wells.

#### General

The Company's strategy is to increase reserves and production in a cost-effective manner through a program that balances lower risk acquisitions and/or mergers and exploratory drilling on VAALCO's domestic acreage with high potential international prospects. Internationally, financial exposure and political risk are mitigated through alliances with experienced industry partners who fund the majority of required capital.

#### International

The Company's international strategy is to pursue selected opportunities that are characterized by reasonable entry costs, favorable economic terms,

high reserve potential relative to capital expenditures and the availability of existing technical data that may be further developed using current technology. The Company believes that it has unique management and technical expertise in identifying international opportunities and establishing favorable operating relationships with host governments and local partners familiar with the local practices and infrastructure.

## 2

The Company owns producing properties and conducts exploration activities as operator of consortium internationally in the Philippines and Gabon. Through participation in a partnership with Hunt Oil Company, VAALCO has additional international interests in Argentina, Peru, Ethiopia, Ghana, Niger and Canada.

### Domestic

The Company's domestic strategy is to build near-term cash flows through focused acquisition of domestic producing properties that have significant exploration or future development potential. The Company will consider both direct acquisitions and/or mergers with companies with production from existing fields. Recognizing that international operations are subject to greater social, economic and political volatility, the Company seeks to build a stable domestic production and reserve base that will permit the Company to continue to participate in more high-risk international projects with greater reserve potential.

The joint venture agreement with Paramount Petroleum, Inc., entitles the Company to acquire, at its option, 25% of any prospect generated by the joint venture, on a non-promoted basis taking into account the Company's interest in the joint venture. The joint venture agreement also provides for the sharing of any revenues attributable to prospects generated by the joint venture and sold to others. The Company committed \$3.0 million to fund overhead, leases, seismic and other amounts in connection with the joint venture all of which has been funded as of December 31, 1999.

The Company owns an interest in approximately 2,600 acres onshore Texas and has interests in producing fields in the Gulf of Mexico.

### Customers

Substantially all of the Company's crude oil and natural gas is sold at the well head at posted or indexed prices under short-term contracts, as is customary in the industry. For the year ended December 31, 1999, one purchaser of the Company's crude oil accounted for essentially all of the Company's total crude oil sales. The Company markets its crude oil share in the Philippines under an agreement with SeaOil Corporation, a local Philippines refiner ("SeaOil"). While the loss of this buyer might have a material effect on the Company in the near term, management believes that the Company would be able to obtain other customers for its crude oil.

### Employees

As of December 31, 1999, the Company had 24 full-time employees, 17 of which were located in the Philippines. The Company is not subject to any collective bargaining agreements and believes its relations with its employees are satisfactory.

### Competition

The oil and gas industry is highly competitive. Competition is particularly intense with respect to acquisitions of desirable oil and gas reserves. There is also competition for the acquisition of oil and gas leases suitable for exploration and the hiring of experienced personnel. Competition also exists with other industries in supplying the energy needs of consumers. In addition, the producing, processing and marketing of oil and gas is affected by a number of factors beyond the control of the Company, the effects of which cannot be accurately predicted.

The Company's competition for acquisitions, exploration, development and production include the major oil and gas companies in addition to numerous independent oil companies, individual proprietors, drilling and acquisition programs and others. Many of these competitors possess financial and personnel resources substantially in excess of those available to the Company, giving those competitors an enhanced ability to pay for desirable leases and to evaluate, bid for and purchase properties or prospects. The ability of the Company to generate reserves in the future will depend on its ability to select and acquire suitable producing properties and prospects for future drilling and exploration.

## 3

### Risk Factors

#### Volatility of Oil and Gas Prices and Markets

The Company's revenues, cash flow, profitability and future rate of growth are substantially dependent upon prevailing prices for oil and gas. The Company's ability to borrow funds and to obtain additional capital on attractive terms is also substantially dependent on oil and gas prices. The Company's production in the Philippines is from mature offshore fields with high production costs. The Company's margin on sales from these fields (the price received for oil less the production costs for the oil) is lower than the margin on oil production from many other areas. As a result, the profitability of the Company's production in the Philippines is affected more by changes in prices than production located in other areas. Historically, oil and gas prices and markets have been volatile and are likely to continue to be volatile in the future. Prices for oil and gas are subject to wide fluctuations in response to relatively minor changes in supply of and demand for oil and gas, market uncertainty and a variety of additional factors that are beyond the control of the Company. These factors include international political conditions, the domestic and foreign supply of oil and gas, the level of consumer demand, weather conditions, domestic and foreign governmental regulations, the price and availability of alternative fuels and overall economic conditions. In addition, various factors, including the availability and capacity of gas gathering systems and pipelines, the effect of federal, state and foreign regulation of production and transportation, general economic conditions, changes in supply due to drilling by other producers and changes in demand may adversely affect the Company's ability to market its oil and gas production. Any significant decline in the price of oil or gas would adversely affect the Company's revenues, operating income, cash flows and borrowing capacity and may require a reduction in the carrying value of the Company's oil and gas properties and its planned level of capital expenditures.

#### Replacement of Reserves

The Company's future success depends upon its ability to find, develop or acquire additional oil and gas reserves that are economically recoverable. Except to the extent that the Company conducts successful exploration or development activities or acquires properties containing proved reserves, the estimated net proved reserves of the Company will generally decline as reserves are produced. There can be no assurance that the Company's planned development and exploration projects and acquisition activities will result in significant additional reserves or that the Company will have continuing success drilling productive wells at economic finding costs. The drilling of oil and gas wells involves a high degree of risk, especially the risk of dry holes or of wells that are not sufficiently productive to provide an economic return on the capital expended to drill the wells. In addition, the Company's drilling operations may be curtailed, delayed or canceled as a result of numerous factors, including title problems, weather conditions, political instability, economic/currency imbalances, compliance with governmental requirements or delays in the delivery of equipment and availability of drilling rigs. Certain of the Company's oil and gas properties are operated by third parties or may be subject to operating committees controlled by national oil companies and, as a result, the Company has limited control over the nature and timing of exploration and development of such properties or the manner in which operations are conducted on such properties.

#### Substantial Capital Requirements

The Company makes, and will continue to make, substantial capital expenditures for the acquisition, exploitation, development, exploration and production of oil and gas reserves. Historically, the Company has financed these expenditures primarily with cash flow from operations, asset sales, private sales of equity, bank borrowings and purchase money debt. The Company believes that it will have sufficient capital to finance planned capital expenditures through 2000.

At December 31, 1999 the Company had \$10.0 million of funds in escrow to be utilized to fund its share of activities within Hunt. The partnership agreement of Hunt obligates the Company to contribute, when requested by Hunt, up to \$1.9 million to fund Hunt's remaining exploration program, \$1.7 million which has been funded as of the date of this filing. In addition, if Hunt discovers oil, the Company may be required to contribute an

additional \$7.5 million to fund the appraisal of the discovery. In the event any of the funds are not called upon at dissolution of the partnership, the amounts in escrow will be reclassified from funds in escrow to cash.

At year end 1999, the Company had invested \$3.0 million in the Paramount joint venture, of which, approximately \$1.2 million has been impaired as of December 31, 1999. There can be no assurance that the Company will realize a return on its investments in Hunt or Paramount or that the Company's investment in the Hunt or Paramount joint venture will be successful.

#### Drilling Risks

Drilling activities are subject to many risks, including the risk that no commercially productive reservoirs will be encountered. There can be no assurance that new wells drilled by the Company will be productive or that the Company will recover all or any portion of its investment. Drilling for oil and natural gas may involve unprofitable efforts, not only from dry wells, but also from wells that are productive but do not produce sufficient net revenues to return a profit after drilling, operating and other costs. The cost of drilling, completing and operating wells is often uncertain and cost overruns are common. The Company's drilling operations may be curtailed, delayed or canceled as a result of numerous factors, many of which are beyond the Company's control, including title problems, weather conditions, compliance with governmental requirements and shortages or delays in the delivery of equipment and services.

#### Operating Hazards and Uninsured Risks

The oil and gas business involves a variety of operating risks, including fire, explosions, blow-outs, pipe failure, casing collapse, abnormally pressured formations and environmental hazards such as oil spills, gas leaks, ruptures and discharges of toxic gases, the occurrence of any of which could result in substantial losses to the Company due to injury and loss of life, severe damage to and destruction of property, natural resources and equipment, pollution and other environmental damage, clean-up responsibilities, regulatory investigation and penalties and suspension of operations. The Company's production facilities are also subject to hazards inherent in marine operations, such as capsizing, sinking, grounding, collision and damage from severe weather conditions. The relatively deep offshore drilling conducted by the Company overseas involves increased drilling risks of high pressures and mechanical difficulties, including stuck pipe, collapsed casing and separated cable. The impact that any of these risks may have upon the Company is increased due to the low number of producing properties owned by the Company. The Company and operators of properties in which it has an interest maintain insurance against some, but not all, potential risks; however, there can be no assurance that such insurance will be adequate to cover any losses or exposure for liability. The occurrence of a significant unfavorable event not fully covered by insurance could have a material adverse effect on the Company's financial condition and results of operations. Furthermore, the Company cannot predict whether insurance will continue to be available at a reasonable cost or at all.

#### Uncertainties in Estimating Reserves and Future Net Cash Flows

There are numerous uncertainties inherent in estimating quantities of proved oil and gas reserves, including many factors beyond the control of the Company. Reserve engineering is a subjective process of estimating the underground accumulations of oil and gas that cannot be measured in an exact manner. The estimates in this document are based on various assumptions required by the Commission, including unescalated prices and costs and capital expenditures, and, therefore, are inherently imprecise indications of future net revenues. Actual future production, revenues, taxes, operating expenses, development expenditures and quantities of recoverable oil and gas reserves may vary substantially from those assumed in the estimates. Any significant variance in these assumptions could materially affect the estimated quantity and value of reserves set forth in this document. In addition, the Company's reserves may be subject to downward or upward revision based upon production history, results of future development, availability of funds to acquire additional reserves, prevailing oil and gas prices and other factors. Moreover, the calculation of the estimated present value of the future net revenue using a 10% discount rate as required by the Commission is not necessarily the most appropriate discount factor based on

interest rates in effect from time to time and risks associated with the Company's reserves or the oil and gas industry in general.

It is also possible that reserve engineers may make different estimates of reserves and future net revenues based on the same available data. In calculating reserves on a BOE basis, gas was converted to oil at the ratio of six Mcf of gas to one Bbl of oil. While this conversion ratio approximates the energy equivalent of oil and gas on a Btu basis, it may not represent the relative prices received by the Company on the sale of its oil and gas production.

The estimated future net revenues attributable to the Company's net proved reserves are prepared in accordance with Commission guidelines, and are not intended to reflect the fair market value of the Company's reserves. In accordance with the rules of the Commission, the Company's reserve estimates are prepared using period end prices received for oil and gas. Future reductions in prices below those prevailing at year-end 1999 would result in the estimated quantities and present values of the Company's reserves being reduced.

A substantial portion of the Company's proved reserves are or will be subject to service contracts, production sharing contracts and other

arrangements. The quantity of oil and gas the Company will ultimately receive under these arrangements will differ based on numerous factors, including the price of oil and gas, production rates, production costs, cost recovery provisions and local tax and royalty regimes. Changes in many of these factors do not affect estimates of U.S. reserves in the same way they affect estimates of proved reserves in foreign jurisdictions, or will have a different effect on reserves in foreign countries than in the United States. As a result, proved reserves in foreign jurisdictions may not be comparable to proved reserve estimates in the United States.

#### Foreign Operations

The Company's international assets and operations are subject to various political, economic and other uncertainties, including, among other things, the risks of war, expropriation, nationalization, renegotiation or nullification of existing contracts, taxation policies, foreign exchange restrictions, changing political conditions, international monetary fluctuations, currency controls and foreign governmental regulations that favor or require the awarding of drilling contracts to local contractors or require foreign contractors to employ citizens of, or purchase supplies from, a particular jurisdiction. In addition, if a dispute arises with foreign operations, the Company may be subject to the exclusive jurisdiction of foreign courts or may not be successful in subjecting foreign persons, especially foreign oil ministries and national oil companies, to the jurisdiction of the United States.

The Company's private ownership of oil and gas reserves under oil and gas leases in the United States differs distinctly from its ownership of foreign oil and gas properties. In the foreign countries in which the Company does business, the state generally retains ownership of the minerals and consequently retains control of (and in many cases, participates in) the exploration and production of hydrocarbon reserves. Accordingly, operations outside the United States may be materially affected by host governments through royalty payments, export taxes and regulations, surcharges, value added taxes, production bonuses and other charges.

Certain of the Company's producing properties are located offshore Palawan Island in the Philippines, and, consequently, a portion of the Company's assets is subject to regulation by the government of the Philippines. Although there has been unrest and uncertainty in the Philippines, to date, the country's Office of Energy Affairs has been largely unaffected by political changes. The Company has operated in the Philippines since 1985 and believes that it has good relations with the current Philippine government. However, there can be no assurance that present or future governmental regulation in the Philippines will not materially adversely affect the operations or cash flows of the Company.

All of the Company's current Philippine producing properties are located in fields covered under Service Contract No. 14. To obtain favorable tax treatment, Philippine nationals must own at least 15% of Service

#### 6

Contract No. 14. Residents of the Philippines currently own in excess of 15% of Blocks A, B, C and D of Service Contract 14, including 53% of Block C. The Company's ability to export oil produced in the Philippines is restricted by the terms of Service Contract No. 14. The Company currently sells its oil production within the Philippines and therefore may be exposed to foreign currency risk.

#### Control by 1818 Fund

In connection with the Hunt Transaction, the Company issued to the 1818 Fund Common Stock and Preferred Stock which votes as a class with the Common Stock on an as converted basis, representing approximately 65% of the outstanding voting power of the Company on an as converted basis (excluding options and warrants). In addition, the terms of the Preferred Stock acquired by the 1818 Fund provide that while the Preferred Stock is outstanding, the holders of Preferred Stock voting together as a class are entitled to elect three directors of the Company. Accordingly, the 1818 Fund is able to control all matters submitted to a vote of the stockholders of the Company, including the election of directors.

In connection with the Hunt Transaction, the Company made certain changes to its bylaws which require that at least a majority of the directors constituting the entire board of directors, which majority must include at least one of the directors elected by the holders of Preferred Stock, approve each of the following transactions effected by either the Company or, as applicable, any subsidiary of the Company, any issuance of or agreement to issue any equity securities, including securities convertible into or exchangeable for such equity securities (other than issuances pursuant to an employee benefit plan); the declaration of any dividend; the incurrence, assumption of or refinancing of indebtedness; the adoption of any employee stock option or similar plan; entering into employment or consulting agreements with annual compensation exceeding \$100,000; any merger or

consolidation; the sale, conveyance, exchange or transfer of the voting stock or all or substantially all of the assets; the sale or other disposition to another person, or purchase, lease or other acquisition from another person, of any material assets, rights or properties; certain expenditures in excess of \$300,000; the formation of any entity that is not wholly-owned by the Company; material changes in accounting methods or policies; any amendment, modification or restatement of the certificate of incorporation or bylaws; the settlement of any claim or other action against the Company or subsidiary in an amount in excess of \$50,000; approval or amendment of the annual operating budget; any other action which is not in the ordinary course of business; and the agreement to take any of the foregoing actions. Accordingly, none of the foregoing actions can be taken by the Company without the approval of at least one director designated by the holders of the Preferred Stock.

#### Investment in Hunt

The Company is a limited partner in Hunt. The general partner without the consent or input of the limited partners makes all decisions concerning the operations of Hunt. Accordingly, the Company is not able to influence decisions with respect to operations of Hunt, including decisions regarding the purchase of concessions and other interests, exploration and development operations (including the location, testing, completing or plugging and abandoning of wells, as well as the gathering of seismic and other geophysical data), farm out and other participation agreements, the acquisition or sale of real and personal property, insurance coverage, bank and other financings and other matters significant to the operations of Hunt.

The exploration activity of Hunt is ongoing. To date, Hunt's exploration activities have not resulted in the discovery of any commercial oil or gas reserves. No assurance can be given that Hunt's activities will result in commercial production or that the Company will realize a return on its investment in Hunt. Hunt's operations are subject to risks applicable to the oil and gas industry in general as well as to risks inherent in foreign operations, and are subject to many of the risks disclosed herein under "Risk Factors" including, without limitation, "--Foreign Operations," "--Volatility of Oil and Gas Prices and Markets," "--Replacement of Reserves," "--Drilling Risks," "--Operating Hazards and Uninsured Risks," "--Uncertainties in Estimating Reserves and Future Net Cash Flows," "--Environmental and Other Regulations" and "--Acquisition Risks."

#### 7

#### Environmental and Other Regulations

The laws and regulations of the United States, Philippines and Gabon regulate the Company's business. In addition, VAALCO owns a 7.5% interest in the Hunt limited partnership, which does business in and is subject to the laws and regulations of other foreign countries. These laws and governmental regulations, which cover matters including drilling operations, taxation and environmental protection, may be changed from time to time in response to economic or political conditions. See "--Foreign Operations."

The Company's domestic operations are subject to numerous laws and regulations governing the discharge of materials into the environment or otherwise relating to environmental protection. The Company's domestic operations could result in liability for personal injuries, property damage, oil spills, discharge of hazardous materials, remediation and clean-up costs and other environmental damages. In addition, the Company could be liable for environmental damages caused by previous property owners. As a result, substantial liabilities to third parties or governmental entities may be incurred; the payment of which could have a material adverse effect on the Company's financial condition, results of operations and liquidity. The Company maintains insurance coverage for its operations, including limited coverage for sudden environmental damages, but does not believe that insurance coverage for environmental damages that occur over time is available at a reasonable cost. Moreover, the Company does not believe that insurance coverage for the full potential liability that could be caused by sudden environmental damages is available at a reasonable cost. Accordingly, the Company may be subject to liability or may lose substantial portions of its properties in the event of certain environmental damages. The Company could incur substantial costs to comply with environmental laws and regulations.

A substantial portion of the Company's producing properties are located offshore. The costs to abandon offshore wells may be substantial. For financial accounting purposes the Company accrues a per BOE charge over the life of a field to cover such abandonment costs. No assurances can be given that such reserves will be sufficient to cover such costs in the future as they are incurred.

The Oil Pollution Act of 1990 imposes a variety of regulations on "responsible parties" related to the prevention of oil spills. The implementation of new, or the modification of existing, environmental laws or regulations, including regulations promulgated pursuant to the Oil Pollution Act of 1990, could have a material adverse impact on the Company.

The recent trend toward stricter standards in environmental legislation and regulation in the U.S. is likely to continue. If such legislation were enacted, it could have a significant impact on the operating costs of the Company, as well as the oil and gas industry in general.

In addition, while the Company believes that it is currently in compliance with environmental laws and regulations applicable to the Company's operations in the Philippines, Gabon and the U.S., no assurances can be given that the Company will be able to continue to comply with such environmental laws and regulations without incurring substantial costs.

#### Acquisition Risks

The Company intends to acquire oil and gas properties. Although the Company performs a review of the acquired properties that it believes is consistent with industry practices, such reviews are inherently incomplete. It generally is not feasible to review in depth every individual property involved in each acquisition. Ordinarily, the Company will focus its due diligence efforts on the higher valued properties and will sample the remainder. However, even an in-depth review of all properties and records may not necessarily reveal existing or potential problems nor will it permit a buyer to become sufficiently familiar with the properties to assess fully their deficiencies and capabilities. Inspections may not be performed on every well, and structural or environmental problems, such as ground water contamination, are not necessarily observable even when an inspection is undertaken. The Company may be required to assume preclosing liabilities, including environmental liabilities, and may acquire interests in properties on an "as is" basis. There can be no assurance that the Company's acquisitions will be successful.

#### 8

#### Reliance on Key Personnel

The Company is highly dependent upon its executive officers and key employees, particularly Messrs. Gerry, Walston and Scheirman. Moreover, the Company's investment in the Paramount joint venture is highly dependent upon Robert Schneeflock. The unexpected loss of the services of any of these individuals could have a detrimental effect on the Company. The Company does not maintain key man life insurance on any of its employees, but maintains a \$4.0 million life insurance policy on Mr. Schneeflock.

#### Forward-Looking Information and Risk Factors

This report includes "forward looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended ("Exchange Act"). All statements other than statements of historical fact included in this Report (and the exhibits hereto), including without limitation, statements regarding the Company's financial position and estimated quantities and net present values of reserves, are forward looking statements. The Company can give no assurances that the assumptions upon which such statements are based will prove to have been correct. Important factors that could cause actual results to differ materially from the Company's expectations ("Cautionary Statements") are disclosed in the section "Risk Factors," elsewhere herein and in other periodic reports filed under the Exchange Act, which are herein incorporated by reference. All subsequent written and oral forward-looking statements attributable to the Company or persons acting on its behalf are expressly qualified by the Cautionary Statements.

#### Item 2. Properties

##### Philippines

The Company has an interest in two service contracts in the Philippines. Service Contract No. 14 covers 158,000 offshore acres and Service Contract No. 6 covers 131,000 offshore acres. The Company produces the Nido and Matinloc fields with a total gross production for 1999 of approximately 313,000 barrels or 860 BOPD.

##### Nido Field

This field is covered by Service Contract No. 14 and has four producing wells. These wells have been producing since 1979, and through the year ended December 31, 1999 had produced an aggregate of approximately 17.1 MMBbls of oil. The field is produced using the cyclic method under which the field is shut in for a period of time (generally 60 days) and then opened up to produce (generally four to five days). However during 1999, the lack of demand for crude oil in Asia resulted in fewer liftings than normal. During 1999, the four wells in the field produced at an equivalent rate of 108 BOPD compared to 244 BOPD in 1998. If optimum liftings were obtained, the field would be capable of producing in excess of 500 BOPD. The Company has an approximate 22.2% working interest and an approximate 17.4% net revenue interest in the field.

##### Matinloc Field

This field is located within the contract area covered by Service Contract No. 14 and has three producing wells. The field had produced an aggregate production of approximately 10.3 MMBbls from 1982 through 1991. Production was suspended from the field in 1991 until it was reactivated in 1995. At December 31, 1999 the field had produced an aggregate of 11.0 MMBbls. During 1999, the field produced approximately 239 MBbls or 655 BOPD. The Company has an approximate 38.1% working interest and an approximate 26.8% net revenue interest in the field. Other production was obtained from the North Matinloc field, which is an extension to the Matinloc field. This field produced 35 MBbls or 96 BOPD from one well during 1999. The Company has an approximate 45.4% working interest and an approximate 40.3% net revenue interest in the North Matinloc field.

During 1998 and 1997 an Australian oil company, (SOCDET), acquired 132,000 line kilometers of 3-D seismic data over Service Contracts No. 14 and No. 6 in exchange for a farm out of interests in the Service Contracts. Upon completion of the seismic shoot and presentation of an interpretation thereof, SOCDET earned

9

a 35% interest in Service Contract No. 14 effective December 29, 1998. In connection with the assignment, SOCDET was assigned an interest in the production platforms, and the liability to abandon them in the future. This resulted in a reversal of abandonment liability net to the Company of \$1.1 million in 1998. An option to earn an additional 25% interest through the drilling of a well was not exercised and expired in October 1999.

#### Galoc Field

This field is located within the contract area covered by Service Contract No. 14 and is currently not producing. Four wells have been drilled in this field, of which one well in 1,150 feet of water has undergone a long-term testing program. The Galoc reservoir is made up of a sandstone turbidite fan sequence that was deposited on top of the Lower Miocene limestone in a deep-water environment. Previous wells tested in excess of 5,000 BOPD. The Galoc field is one of the areas being studied extensively for the potential to drill an additional delineation well in the field.

#### Gabon

VAAALCO has an interest in one offshore block in Gabon, the Etame Block. Interest in the block vests in a production-sharing contract entered into by the Company's subsidiary VAAALCO (Gabon) Equata, Inc., providing for two three-year terms, which commenced in July 1995. The Company elected to extend the contract into the second three-year term during 1998. As a result of the participation agreement discussed below, VAAALCO currently owns a 17.9% interest in the production-sharing contract covering the Etame Block.

#### Etame Block

The Etame Block is a 3,073 square kilometer block acquired in July 1995, containing two former Gulf Oil Company discoveries, the North and South Tchibala discoveries. These discoveries consist of subsalt reservoirs that lie in approximately 250 feet of water depth, 20 miles offshore. The Company and its partners undertook an obligation to the Government of Gabon to obtain and process seismic data and to drill one commitment well on the Etame block over the three-year primary term of the license. In April 1998, a participation agreement was entered into with Western Atlas Afrique, Ltd. ("Western Atlas"), a subsidiary of Baker Hughes, to conduct a 320 square kilometer seismic survey at Western Atlas' sole cost and to pay a disproportionate 80% of the cost, up to \$4.7 million, of the first commitment well. In return for these payments, Western Atlas earned a 65% interest in the production-sharing contract. In June 1998, Western Atlas completed the above-mentioned acquisition of seismic data over the property. This data was processed, and the Company drilled the commitment well, the Etame No. 1 well, in June 1998 resulting in a 3,700 BOPD Gamba sandstone discovery on the block. Completion of the Etame No. 1 well satisfied all of the Company's obligations to the Government of Gabon under the primary three-year term of the contract.

During 1998, the consortium of companies owning the Etame Block production sharing contract agreed to renew the production sharing contract for three additional years, thereby taking on a commitment to drill two additional exploration wells and to perform a 3-D seismic reprocessing. A delineation well, the Etame 2V well, was drilled in January 1999 and encountered additional oil pay in the Gamba sandstone, however the well encountered the Gamba sandstone lower than expected. The Consortium elected to reprocess the 3-D seismic data prior to drilling additional delineation wells. The Company anticipates drilling at least one additional delineation well in 2000. The Etame 2V counted as the first of the two commitment wells under the three-year contract term extension.

#### Domestic Properties

## Paramount Joint Venture

The Company participates in a joint venture with Paramount Petroleum, Inc. to conduct exploration activities primarily in the onshore Gulf Coast area, including Alabama, Mississippi and Louisiana. During 1999, the Company agreed to take a 9% interest in two prospects drilled during the second and third quarters of 1999.

10

Neither of the two prospects encountered commercial hydrocarbons and both were abandoned. During February 2000, two additional prospects generated by Paramount were spudded in Alabama in the Black Warrior Basin one of which appears to be a gas discovery. The Company elected not to take a working interest in the prospects, but will earn a back-in and override in the prospects if they are successful.

## Brazos County Prospects

The Company has working interests in approximately 1,600 net acres in Brazos County, Texas, which the Company leased with the intent to participate in the drilling of extended-reach horizontal wells in the underlying Buda and Georgetown formations. Substantially all of these leases will expire during 2000. Drilling plans were placed on hold in reaction to the low crude oil price environment experience by the industry in 1998 and 1999. The Company is actively attempting to arrange a consortium to drill one of the prospects during 2000. The Company does not plan to renew any of its leases in the area, pending the outcome of the prospect it is seeking to drill. During 1999, the Company took an impairment charge of \$0.7 million associated with the expiration of approximately 4,200 acres of leases in Brazos County.

## Goliad County, Texas

VAALCO owns an interest in approximately 1,000 acres located immediately west of the Goliad town site. The acreage consists of approximately 70 leases and is located within an area of the Wilcox trend that has recently seen a considerable amount of leasing, 3-D seismic and drilling activity. In January 1998, a farm out agreement was entered into with an industry partner over 1,000 acres of its Goliad acreage whereby the Company recovered its lease costs and assigned a 75% working interest to its partner. The Company owns certain overriding royalties and a 25% working interest in the acreage. The leases expire in 2001.

## Other Domestic Properties

The Company owns an interest in 640 acres (224 net acres) in Dimmit County on which a horizontal gas well was drilled in 1999 to the Georgetown formation. The well is productive and is awaiting testing results. The Company's net cost of the well (approximately \$425,000) is carried as work in progress at year-end 1999. The Company also owns certain non-operated interests in the Vermilion and Ship Shoal areas of the Gulf of Mexico, which accounted for no significant production during the year ended December 31, 1999. No capital expenditures are anticipated in 2000 for these properties.

## Aggregate Production

Additional production data (net to the Company) for all of the Company's operations for the years 1999 and 1998 are as follows: (See "Item 1-- BACKGROUND" regarding the merger with 1818 Oil Corp.)

## Company Owned Production

<TABLE>

<CAPTION>

	Year Ended December 31,					
	1999			1998		
	BOE(1)	Bbl	Mcf	BOE(1)	Bbl	Mcf
<S>	<C>	<C>	<C>	<C>	<C>	<C>
Average Daily Production (Oil in BOPD, gas in MCFD).....	251	249	13	332	332	--
Average Sales Price (\$/unit) (2).....	\$9.04	\$9.00	\$2.26	\$6.51	\$6.51	--
Average Production Cost (\$/unit).....	6.03	6.03	1.00	\$5.10	\$5.10	--

</TABLE>

- - - - -

(1) BOE is barrels of oil equivalent with 6 Mcf of gas equal to 1 Bbl of oil.

(2) Oil prices are primarily from the Philippines properties where a formula for transportation costs is netted from the sales price.

11

## Reserve Information

A reserve report as of December 31, 1999 has been opined on by Netherland Sewell & Associates, independent petroleum engineers. There have been no estimates of total proved net oil or gas reserves filed with or included in reports to any federal authority or agency other than the Commission since the beginning of the last fiscal year. All of the reserves are located in the Philippines. There are no reserve estimates for the U.S. properties or for the Etame discovery in Gabon, pending further delineation drilling. (See "Item 1--BACKGROUND" regarding the merger with 1818 Oil Corp.)

<TABLE>  
<CAPTION>

	As of December 31,	
	1999	1998
	-----	-----
<S>	<C>	<C>

Proved Developed Reserves (MBbls).....	661	691
Proved Undeveloped Reserves (MBbls).....	--	--
	-----	-----
Total Proved Reserves (MBbls).....	661	691
	-----	-----
Standardized measure of discounted future net cash flows at 10% (in thousands).....	\$ 2,823	\$ 226
	-----	-----

</TABLE>

The standardized measure of discounted cash flows does not include the costs of abandoning the Company's non-producing properties. The significant increase in standardized measure of discounted future net cash flows reflects the increases in oil prices in 1999.

There are numerous uncertainties inherent in estimating quantities of proved reserves and in projecting future rates of production and timing of development expenditures, including many factors beyond the control of the Company. Reserve engineering is a subjective process of estimating underground accumulations of crude oil and natural gas that cannot be measured in an exact manner, and the accuracy of any reserve estimate is a function of the quality of available data and of engineering and geological interpretation and judgment. The quantities of oil and natural gas that are ultimately recovered, production and operating costs, the amount and timing of future development expenditures and future oil and natural gas sales prices may all differ from those assumed in these estimates. The standardized measure of discounted future net cash flow should not be construed as the current market value of the estimated oil and natural gas reserves attributable to the Company's properties. The information set forth in the foregoing tables includes revisions for certain reserve estimates attributable to proved properties included in the preceding year's estimates. Such revisions are the result of additional information from subsequent completions and production history from the properties involved or the result of a decrease (or increase) in the projected economic life of such properties resulting from changes in product prices. Moreover, crude oil amounts shown are recoverable under the service contracts and the reserves in place remain the property of the Philippine government.

In accordance with the guidelines of the Commission, the Company's estimates of future net cash flow from the Company's properties and the present value thereof are made using oil and natural gas contract prices in effect as of year end and are held constant throughout the life of the properties except where such guidelines permit alternate treatment, including the use of fixed and determinable contractual price escalations. The contract price as of December 31, 1999 was \$11.95 per Bbl of oil for Matinloc and \$11.45 per Bbl for Nido. See "Financial Statements and Supplementary Data" for certain additional information concerning the proved reserves of the Company.

12

#### Drilling History

The Company drilled or participated in the drilling of six wells for the period ended December 31, 1999. The Company had two wells in progress at December 31, 1999. Both productive wells drilled were suspended at December 31, 1999.

<TABLE>

- (1) Net acreage and net productive wells are based upon the Company's working interest in the properties.  
(2) Includes acreage attributable to the investment in Hunt.

#### Office Space

The Company leases its offices in Houston, Texas (approximately 8,000 square feet) and in Manila, The Republic of the Philippines (approximately 3,000 square feet), which management believes are suitable and adequate for the Company's operations.

#### Item 3. Legal Proceedings

The Company is currently not a party to any material litigation.

#### Item 4. Submission of Matters to a Vote of Security Holders

None.

13

#### PART II

#### Item 5. Market for Common Equity and Related Stockholder Matters

##### General

The Company's Common Stock trades on the OTC Bulletin Board. The following table sets forth the range of high and low sales prices of the Common Stock for the periods indicated. The prices represent adjusted prices between dealers, do not include retail markups, markdowns or commissions and do not necessarily represent actual transactions. As of December 31, 1999 there were approximately 96 holders of record of the Company's Common Stock.

<TABLE>  
<CAPTION>

Period	High	Low
-----	-----	-----
<S>	<C>	<C>
1998:		
First Quarter.....	\$2.69	\$1.88
Second Quarter.....	3.56	2.50

Fourth Quarter.....	0.75	0.44
2000:		
First Quarter (through March 16, 2000).....	\$0.63	\$0.41

</TABLE>

On March 16, 2000, the last reported sale price of the Common Stock on the OTC Bulletin Board was \$0.44 per share.

#### Dividends

The Company has not paid cash dividends and does not anticipate paying cash dividends on the Common Stock in the foreseeable future.

## Item 6. Management's Discussion and Analysis or Plan of Operations

### Introduction

In April 1998, the Company acquired from The 1818 Fund, a fund managed by Brown Brothers Harriman & Co., all of the outstanding capital stock of 1818 Oil Corp. The 1818 Oil Corp. acquisition has been accounted for as a reverse acquisition and 1818 Oil Corp. is the acquiring entity for financial accounting purposes. Therefore, because 1818 Oil Corp. is the acquirer for accounting purposes, the financial statements for prior years are those of 1818 Oil Corp., not VAALCO the legal acquirer. Accordingly, a comparison of 1999 and 1998 results is not meaningful. 1818 Oil Corp.'s equity as of December 31, 1999 and December 31, 1998 have been retroactively charged for the equivalent number of shares of VAALCO's common stock received in the transaction. The difference between the par value of the common stock of 1818 Oil Corp. and VAALCO has been charged to additional paid-in capital. In addition, at the time of the merger, 1818 Fund contributed the debt owed to it by 1818 Oil Corp. as additional paid-in capital to 1818 Oil Corp.

The Company's results of operations are dependent upon the difference between prices received for its oil and gas production and the costs to find and produce such oil and gas. Oil and gas prices have been and are expected in the future to be volatile and subject to fluctuations based on a number of factors beyond the control of the Company. The Company's production in the Philippines is from mature offshore fields with high production costs. The Company's margin on sales from these fields (the price received for oil less the production costs for the oil) is lower than the margin on oil production from many other areas. As a result, the profitability

14

of the Company's production in the Philippines is affected more by changes in oil prices than production located in other areas.

The Company's results of operations are also affected by currency exchange rates. The Company and Seaoil Corporation, the purchaser of the Company's Philippines production, have agreed that 20% of the price of oil paid by Seaoil to the Company will be paid in Philippine pesos at the prevailing rate, up to 40 pesos to the dollar. A decrease in the exchange rate of pesos to the dollar will have the effect of reducing the price received for oil (in U.S. dollars). This reduction will be partially offset because certain operating costs paid by the Company and Seaoil are paid in Philippine pesos.

A substantial portion of the Company's oil production is located offshore of the Philippines. The Company produces into barges, which transport the oil to market. Due to weather and other factors, the Company's production is generally highest during the first and fourth quarters of the year.

The Company uses the successful efforts method to account for its investment in oil and gas properties whereby costs of productive wells, developmental dry holes and productive leases are capitalized and amortized using the units-of-production method based on estimated net proved reserves. The costs of development wells are capitalized but charged to expense if and when the well is determined to be unsuccessful. Geological and geophysical costs and the costs of carrying and retaining undeveloped properties are expensed as incurred.

### Capital Resources and Liquidity

Historically, the Company's primary source of capital resources has been from cash flows from operations, private sales of equity, borrowings and purchase money debt. In 1998, cash was derived predominantly from the sale of marketable securities, and the private placement of Common Stock, Preferred Stock and debt. In 1999, the Company's primary uses of capital have been to fund its exploration operations.

The Company produces oil from the Matinloc and Nido fields in the South China Sea, the Philippines. During the year ended December 31, 1999, total production from the fields was approximately 313,000 gross barrels of oil. Substantially all of the Company's crude oil and natural gas is sold at the well head at posted or index prices under short-term contracts, as is customary in the industry. The Company markets its share of crude oil under an agreement with Seaoil, a local Philippines refiner. While the loss of this buyer might have a material effect on the Company in the near term, management believes that the Company would be able to obtain other customers for its crude oil.

On April 21, 1998 VAALCO consummated the acquisition of 1818 Oil Corp. for 10,000 shares of Convertible Preferred Stock, Series A. The assets of 1818 Oil Corp. consisted at closing of a 7.5% limited partnership interest in Hunt with book value of \$2.8 million and \$12.6 million in cash. As a result of the voting control 1818 Oil Corp.'s shareholder obtained in the transaction, the

1818 Oil Corp. acquisition has been accounted for as a reverse acquisition and 1818 Oil Corp. is the acquiring entity for financial accounting purposes. The financial statements presented for the prior year periods are those of 1818 Oil Corp., not VAALCO the legal acquirer. The results of operations of VAALCO are included in the accompanying financial statements for the periods subsequent to the date of the acquisition. Accordingly, a comparison of 1999 and 1998 results is not meaningful. The legal name of the registrant continues to be VAALCO Energy, Inc.

Hunt has entered into production sharing contracts and other arrangements which entitle it to explore for oil and gas, both onshore and offshore, on approximately 34 million acres in countries including Argentina, Canada, Ethiopia, Ghana, Niger and Peru. Under the partnership agreement with Hunt, at December 31, 1999 the Company was obligated to contribute an estimated \$1.9 million to fund its share of the exploration costs of Hunt. In addition, if Hunt discovers oil or gas deposits, the Company may be required to contribute an additional \$7.5 million to fund appraisal costs. The partnership has no further call on funds from VAALCO beyond these two described obligations. As of December 31, 1999 VAALCO had \$10.0 million in cash in an escrow account to fund its obligations under the partnership agreement, which includes \$0.6 million of interest earned on the funds that is not pledged to the partnership.

15

During 1998, the Company issued 5.2 million shares of Common Stock in a private placement for proceeds of \$9.0 million net of \$0.8 million in fees and expenses. These amounts will be used to fund the Company's capital expenditure program, including investments in the Paramount joint venture and possible future acquisitions, and for general corporate purposes.

At year-end 1999, the Company had invested \$3.0 million in the Paramount joint venture of which \$1.2 million has been impaired as of December 31, 1999.

The Company continues to seek financing to fund the development of existing properties and to acquire additional assets. The Company will rely on the issuance of equity and debt securities, assets sales and cash flow from operations to provide the required capital for funding future operations. While there can be no assurance the Company will be successful in raising new financing, management believes the prospects the Company has in hand will enable it to attract sufficient capital to fund required oil and gas activities.

During 2000, the Company anticipates that it will make capital expenditures on oil and gas properties of approximately \$3.5 million, including Hunt partnership expenditures and a well in Gabon. The anticipated capital expenditures exclude potential acquisitions. The Company believes the cash on hand at December 31, 1999 will be sufficient to fund the Company's capital budget through 2000.

#### Year 2000

The Company experienced no Year 2000 issue problems. The Company expended approximately \$20,000 for Year 2000 upgrades to computer programs utilized in its accounting department.

#### Results of Operations

The 1818 Oil Corp. acquisition has been accounted for as a reverse acquisition and 1818 Oil Corp. is the acquiring entity for financial accounting purposes. As such, the financial statements presented for the prior year, are those of 1818 Oil Corp., not VAALCO the legal acquirer. The results of operations of VAALCO are included in the accompanying financial statements for the periods subsequent to the date of the acquisition. Accordingly, a comparison of 1999 and 1998 results is not meaningful. The legal name of the registrant continues to be VAALCO Energy, Inc.

#### Year Ended December 31, 1999 Compared to Year Ended December 31, 1998

Amounts stated hereunder have been rounded to the nearest \$100,000; however, percentage changes have been calculated using the accompanying consolidated financial statement amounts.

#### Cash Flows

Net cash provided by operating activities for 1999 was \$1.1 million, as compared to net cash used in operating activities of \$15.3 million in 1998. 1999 net cash provided by operations included \$7.6 million from funds taken out of escrow. This was offset by settlement of \$1.4 million of accounts payable and \$4.2 million of accounts with partners. 1998 net cash used in operating activities included \$17.6 million of funds placed in escrow for the Hunt exploration program, Gabon drilling and the Paramount joint venture.

Net cash used in investing activities for 1999 was \$4.8 million, as compared to net cash used in investing activities of \$0.7 million in 1998.

Investments in Hunt and Paramount total \$3.1 and \$3.9 million in 1999 and 1998 respectively. \$1.5 million of exploration expenses were incurred in 1999 versus \$0.9 million in 1998. Additions to property and equipment of \$0.3 million in 1999 and \$1.4 million in 1998 occurred primarily in Gabon. In 1998, the Company acquired assets net of cash of \$3.2 million as a consequence of the merger with 1818 Oil Corp.

Net cash provided by financing activities for 1999 was \$0, as compared to net cash provided by financing activities of \$22.6 million in 1998. The 1998 amount consists of proceeds from the issuance of Common Stock and capital contributed in conjunction with the merger with 1818 Oil Corp.

16

#### Revenues

Total oil and gas sales for 1999 were \$0.8 million as compared to \$0.6 for 1998. The 1999 and 1998 revenues include revenues relating to the Philippines, with 1999 representing a full year of operations, and 1998 excluding production prior to the merger in April 1998. The Company produced the Nido and Matinloc fields at approximately 860 BOPD in 1999 versus 797 BOPD in 1998.

#### Operating Costs and Expenses

Production expenses for 1999 were \$0.6 million as compared to \$0.5 for 1998. 1999 production expense included the cost of an underwater platform inspection at the Matinloc field.

Exploration costs for 1999 were \$1.5 million as compared to \$0.9 for 1998. In 1999, the company drilled unsuccessful exploration wells in Texas and Alabama, and incurred charges associated with expiring exploration acreage of \$0.7 million. In addition, 1999 exploration costs included \$0.3 million of seismic reprocessing expense associated with Gabon. In 1998, exploration costs included costs of the exploration wells drilled in Texas, Alabama and Louisiana.

Depreciation, depletion and amortization of properties for 1999 and 1998 was \$0.

General and administrative expenses for 1999 were \$1.9 million as compared to \$1.5 million for 1998. 1999 general and administrative expenses included the full year results, while 1998 general and administrative expenses only included the VAALCO portion from the effective date of the merger in April 1998.

#### Operating Loss

Operating loss for 1999 was \$3.0 million as compared to a \$2.2 million operating loss for 1998 reflecting higher exploration costs and general and administrative expense.

#### Other Income (Expense)

Interest income for 1999 was \$0.8 million compared to \$0.9 million in 1998. Both the 1999 and 1998 amounts represent interest earned and accrued on cash balances and funds in escrow.

Equity in loss on unconsolidated entities expense for 1999 was \$3.8 million compared to \$1.1 million in 1998. Expenses associated with the Paramount exploration effort and Hunt accounted for the losses in both 1999 and 1998.

Interest expense and financing charges for 1999 were \$0 as compared to \$0.4 million in 1998. In 1998, interest was accrued on advances to the Company to fund Hunt expenses. All accrued interest and long-term debt associated with these advances was extinguished in conjunction with the merger, with the gain reflected in additional paid in capital.

Other, net was a loss of \$0.4 million in 1999 compared to a gain of \$1.1 million in 1998. In 1999 the Company took a \$0.2 million abandonment liability accrual associated with an interest in Service Contract No. 14, which was reassigned to it by a local company. In 1998 the assignment of the interest in Service Contract No. 14 to SOCDDET resulted in a reduced abandonment liability of \$1.1 million in the Philippines.

In 1999 the Company incurred \$0.2 million in income taxes associated with foreign exchange movements in the Philippines, all of which was deferred.

#### Net Loss

Net loss attributable to common stockholders for 1999 was \$6.6 million as compared to net loss of \$1.8 million in 1998. The 1999 and 1998 net losses resulted from exploration expenses internationally as well as domestically.

17

## INDEPENDENT AUDITORS' REPORT

To the Board of Directors and Stockholders of VAALCO Energy, Inc. and Subsidiaries:

We have audited the consolidated balance sheets of VAALCO Energy, Inc. and its subsidiaries ("VAALCO") as of December 31, 1999 and 1998, and the related consolidated statements of operations, stockholders' equity, and cash flows for the years then ended. These financial statements are the responsibility of VAALCO's management. Our responsibility is to express an opinion on the financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of VAALCO as of December 31, 1999 and 1998, and the results of its operations and its cash flows for the years then ended in conformity with generally accepted accounting principles.

# VAALCO ENERGY, INC. AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEARS ENDED DECEMBER 31, 1999 AND 1998

(in thousands of dollars, unless otherwise indicated)

### 1. ORGANIZATION

VAALCO Energy, Inc., a Delaware corporation, is a Houston-based independent energy company principally engaged in the acquisition, exploration, development and production of crude oil and natural gas. As used herein, the terms "Company" and "VAALCO" mean VAALCO Energy, Inc. and its subsidiaries, unless the context otherwise requires. VAALCO owns producing properties and conducts exploration activities as operator of consortium internationally in the Philippines and Gabon. Through participation in a partnership with Hunt Oil Company, VAALCO has additional international exploration interests in Argentina, Peru, Ethiopia, Ghana, Niger and Canada. Domestically, the Company has interests in the Texas Gulf Coast area.

In April 1998, the Company acquired from The 1818 Fund II, L.P., (the 1818 Fund), a fund managed by Brown Brothers Harriman & Co., all of the outstanding capital stock of 1818 Oil Corp. The assets of 1818 Oil Corp. at closing consisted of a 7.5% limited partnership interest in Hunt Overseas Exploration Company, L.P. ("Hunt") with book value of \$2.8 million and \$12.6 million in cash. The \$12.6 million of cash that 1818 Oil Corp. had at the time of the acquisition was pledged as cash collateral to secure a letter of credit payable to Hunt for cash calls associated with the partnership. In the event any of the funds are not called upon at dissolution of the partnership, the amounts in escrow will be reclassified from funds in escrow to cash.

Hunt has entered into production sharing contracts and other arrangements which entitle it to explore for oil and gas, both onshore and offshore, on approximately 34 million acres in countries including Argentina, Peru, Ethiopia, Ghana, Niger and Canada. The general partner of Hunt is Hunt Overseas Operating Company, a subsidiary of Hunt Oil Company. Hunt explores for high risk, large reserve accumulations, generally targeting deposits which pre-drilling seismic and other data indicate to have potential in excess of 100 MMBOE.

Under the partnership agreement with Hunt, at December 31, 1999 the Company was obligated to contribute an estimated \$1.9 million to fund its share of the exploration costs of Hunt. In addition, if Hunt discovers oil or gas deposits, the Company may be required to contribute an additional \$7.5 million to fund appraisal costs. The partnership has no further call on funds from VAALCO beyond these two described obligations. As of December 31, 1999 VAALCO had \$10.0 million in cash in an escrow account to fund its obligations under the partnership agreement, which includes \$0.6 million of interest earned on the funds since they were placed in escrow, which is not pledged to the partnership.

The 1818 Oil Corp. acquisition has been accounted for as a reverse acquisition and 1818 Oil Corp. is the acquiring entity for financial accounting purposes. Therefore, because 1818 Oil Corp. is the acquirer for accounting purposes, the financial statements for prior years are those of 1818 Oil Corp., not VAALCO the legal acquirer. Accordingly, a comparison of

1999 and 1998 results is not meaningful. 1818 Oil Corp.'s equity as of December 31, 1999 and December 31, 1998 have been retroactively charged for the equivalent number of shares of VAALCO's common stock received in the transaction. The difference between the par value of the common stock of 1818 Oil Corp. and VAALCO has been charged to additional paid-in capital. In addition, at the time of the merger, 1818 Fund contributed the debt owed to it by 1818 Oil Corp. as additional paid-in capital to 1818 Oil Corp.

23

VAALCO ENERGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

FOR THE YEARS ENDED DECEMBER 31, 1999 AND 1998

(in thousands of dollars, unless otherwise indicated)

Basic net loss per share.....	(0.07)

</TABLE>

1818 Oil Corp. ("1818 Oil") is a corporation that was organized and commenced operations on September 13, 1995 under the General Corporation Law of the State of Delaware. Prior to the merger, 1818 Oil was a wholly owned subsidiary of the 1818 Fund, a limited partnership organized on August 20, 1993 under the Delaware Revised Uniform Limited Partnership Act. The 1818 Fund owned beneficial and legal title to all outstanding equity and voting securities of 1818 Oil. The general partner of the 1818 Fund is Brown Brothers Harriman & Co. ("BBH&Co."), a New York limited partnership. BBH&Co. had the exclusive power to manage, operate and control the businesses of the 1818 Fund and 1818 Oil and has sole discretion in making investment decisions.

On September 13, 1995, 1818 Oil entered into a subscription agreement to purchase Class B limited partnership interest in Hunt Overseas Exploration Company, L.P. (the "Hunt Partnership"), a Delaware limited partnership, in the amount of \$30,000,000. The nature of Hunt's business is the exploration of international oil and gas prospects. Countries in which exploration activities are conducted by Hunt include Argentina, Canada, Ethiopia, Niger, Ghana, and Peru. As of December 31, 1999, 1818 Oil's contributed capital to Hunt was \$20.6 million.

Within the gross commitment level of \$30 million to Hunt, first level commitments comprise 75% (\$22.5 million) and second level commitments comprise 25% (\$7.5 million). First level commitments are associated with exploration efforts while second level commitments may only be called by Hunt after a discovery well has been drilled upon any of the properties of Hunt, and may only be used by Hunt in connection with appraisal activities to evaluate whether such properties are worthy of being developed commercially.

As of December 31, 1999 and 1998, remaining first and second level commitments were as follows:

<TABLE>

VAALCO's subsidiaries include Alcorn (Philippines) Inc. and Alcorn (Production) Philippines Inc., VAALCO Gabon (Etame), Inc., VAALCO Production (Gabon), Inc., VAALCO Energy (Gabon), Inc., VAALCO Energy (USA), Inc. and 1818 Oil Corp.

24

VAALCO ENERGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

FOR THE YEARS ENDED DECEMBER 31, 1999 AND 1998

(in thousands of dollars, unless otherwise indicated)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation--The accompanying consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries, as well as the subsidiaries' share in the assets, liabilities, income and expenses of joint operations. All significant transactions within the consolidated group have been eliminated in consolidation.

Cash and Cash Equivalents--For purposes of the consolidated statement of cash flows, the Company and its subsidiaries consider all highly liquid debt instruments purchased with an original maturity of three months or less to be cash equivalents. For the years ended December 31, 1999 and 1998, no payments were made for income taxes or for interest.

Funds in Escrow--Current amounts represent an escrow for the drilling of the Etame 2V well in Gabon. Other funds in escrow represent amounts for Hunt (\$9,996) and funds for abandonment costs relating to certain Gulf of Mexico properties (\$108).

Inventory Valuation--Materials and supplies are valued at the lower of cost, determined by the weighted-average method, or market.

Income Taxes--The Company records taxes on income in accordance with Statement of Financial Accounting Standards "SFAS" No. 109, "Accounting for Income Taxes". Under SFAS No. 109, deferred income taxes reflect the net tax effects of (a) temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes, and (b) operating loss and tax credit carryforwards.

The Company calculates current and deferred income taxes on separate company basis. Deferred income taxes are recognized for future tax consequences of differences between the tax basis of assets and liabilities and their financial reporting amounts at year-end.

Property and Equipment--The subsidiaries follow the successful efforts method of accounting for exploration and development costs. Under this method, exploration costs, other than the cost of exploratory wells, are charged to expense as incurred. Exploratory well costs are initially capitalized until a determination as to whether proved reserves have been discovered. If an exploratory well is deemed to not have found proved reserves, the associated costs are expensed at that time. All development costs, including developmental dry hole costs, are capitalized. Provisions for impairment of undeveloped oil and gas leases are based on periodic evaluations and other factors. The Company recognizes gains for the sale of developed properties based upon an allocation of property costs between the interest sold and the interest retained based on the fair value of those interests.

The Company reviews its oil and gas properties for impairment whenever events or changes in circumstances indicate that the carrying amount of such properties may not be recoverable. When it is determined that an oil and gas property's estimated future net cash flows will not be sufficient to recover its carrying amount, an impairment charge must be recorded to reduce the carrying amount of the asset to its estimated fair value. For years ending December 31, 1999 and 1998, no impairments were recognized.

Depletion of wells, platforms and other production facilities are provided on a field basis under the unit-of-production method based upon estimates of proved developed reserves. Provision for estimated abandonment costs, including platform dismantlement and site restoration, is included in depreciation, depletion and

25

VAALCO ENERGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

FOR THE YEARS ENDED DECEMBER 31, 1999 AND 1998

(in thousands of dollars, unless otherwise indicated)

amortization expense on a unit-of-production basis. Provision for depreciation of other property is made primarily on a straight-line basis over the estimated useful life of the property. The annual rates of depreciation are as follows:

<TABLE>	
<S>	<C>
Office and miscellaneous equipment.....	3-5 years
Leasehold improvements.....	8-12 years
</TABLE>	

In connection with the annual estimate of the Company's oil and gas reserves for the fiscal year ended December 31, 1999, the Company's independent petroleum engineers estimated proved oil reserves at December 31, 1999 to be 0.7 million barrels, all of which are classified as proved developed, net to the Company. The Company had no gas reserves at December 31, 1999. The proved developed reserves relate to the Company's Philippine operations.

During 1999, the Company was reassigned a 2.6% interest in Block C of Service Contract No. 14 from a local company in consideration of an unpaid note receivable. (The Company had previously fully reserved the note receivable in 1996). Consequently, the Company recorded \$816 of Property, Plant and Equipment attributable to these assets based on prior investments and \$816 of Accumulated Depreciation, Depletion and Amortization since no proven reserves were reacquired. Due to the non-cash nature of the acquisition, these amounts have no effect on the Statement of Consolidated Cash Flows.

Investments--The Company invests funds in escrow and excess cash in certificates of deposit and commercial paper issued by banks with maturities typically not exceeding 90 days.

At December 31, 1999, the Company accounted for its investments in unconsolidated entities under the equity method.

At December 31, 1999, the investment in unconsolidated entities was valued at fair value using methods determined in good faith by management after consideration of all relevant information, including, current financial information and restrictions on dispositions. The values assigned to the investments do not necessarily represent the amount which might ultimately be realized upon the sale or other disposition, since such amounts depend on future circumstances and cannot reasonably be determined until actual liquidation occurs. However, because of the inherent uncertainty of such valuations, those estimated values may differ significantly from the values that would have been used had a ready market for the investments existed, and the difference could be material.

Foreign Exchange Transactions--For financial reporting purposes, the subsidiaries use the United States dollar as their functional currency. Monetary assets and liabilities denominated in foreign currency are translated to U.S. dollars at the rate of exchange in effect at the balance sheet date, and items of income and expense are translated at average monthly rates. Nonmonetary assets and liabilities are translated at the exchange rate in effect at the time such assets were acquired and such liabilities were incurred. Gains and losses on foreign currency transactions are included in income currently and were insignificant during each of 1999 and 1998.

Accounts With Partners--Accounts with partners represent cash calls due or excess cash calls paid by the partners for exploration, development and production expenditures made by the following subsidiaries of the Company: APPI-14, APPI-6, and VAALCO Gabon (Etame), Inc.

Revenue Recognition--The Company recognizes revenues from crude oil and natural gas sales upon delivery to the buyer.

Fair Value of Financial Instruments--The Company's financial instruments consist primarily of cash, trade accounts and note receivables and trade payables. The book values of cash, trade receivables, and trade payables are representative of their respective fair values due to the short-term maturity of these instruments. The book value of the Company's note receivable instruments are considered to approximate the fair value, as the interest

rates are adjusted based on rates currently in effect.

Risks and Uncertainties--The Company's interests are located overseas in certain offshore areas of the Philippines and Gabon.

Substantially all of the Company's crude oil and natural gas is sold at the well head at posted or index prices under short-term contracts, as is customary in the industry. For the year ended December 31, 1999 one purchaser of the Company's crude oil accounted for essentially all of the Company's total crude oil sales. The Company markets its crude oil share under an agreement with SeaOil, a local Philippines refiner. While the loss of this buyer might have a material effect on the Company in the near term, management believes that the Company would be able to obtain other customers for its crude oil.

All of Hunt's operations are conducted outside the United States. The partnership attempts to conduct its affairs so as to protect against risks that may be inherent in doing business in international locations.

Estimates of oil and gas values as made in the financial statements require extensive judgments and are generally less precise than other estimates made in connection with financial disclosures. Assigning monetary values to such estimates does not reduce the subjectivity and changing nature of such estimates of value. The information set forth herein is therefore subjective and, since judgments are involved, may not be comparable to estimates of value made by other companies. The Company considers its estimates to be reasonable; however, due to inherent uncertainties and the limited nature of data, estimates are imprecise and subject to change over time as additional information become available.

In June 1998, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards ("SFAS") No. 133, "Accounting for Derivative Instruments and Hedging Activities" which was amended in June 1999 by SFAS No. 137, "Accounting for Derivative Instruments and Hedging Activities--Deferral of the Effective Date of FASB Statement No. 133--an amendment of FASB Statement No. 133." SFAS No. 133, as amended, is effective for derivative instruments and hedging activities that require an entity to recognize all derivatives as an asset or liability measured at its fair value. Depending on the intended use of the derivative, changes in its fair value will be reported in the period of change as either a component of earnings or a component of comprehensive income. Retroactive application to periods prior to adoption is not allowed. The Company is not affected by adoption of FASB No. 133, as amended, in this reporting period as it has no current hedging activities.

Use of Estimates in Financial Statement Preparation--The preparation of financial statements in conformity with generally accepted accounting principles requires estimates and assumptions that affect the reported amounts of assets and liabilities as well as certain disclosures. The Company's financial statements include amounts that are based on management's best estimates and judgments. Actual results could differ from those estimates.

Reclassifications--Certain amounts from 1998 have been reclassified to conform to the 1999 presentation.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

FOR THE YEARS ENDED DECEMBER 31, 1999 AND 1998

(in thousands of dollars, unless otherwise indicated)

3. INVESTMENT IN UNCONSOLIDATED ENTITIES

At December 31, 1999, VAALCO had the following investments:

<TABLE>

<CAPTION>

	December 31, 1999	December 31, 1998
	-----	-----
<S>	<C>	<C>
Investment in Hunt.....	\$ 2,439	\$3,094
Investment in VAALCO Exploration LLC.....	1,758	1,855
	-----	-----
	\$ 4,197	\$4,949
	=====	=====

</TABLE>

Investment in Hunt represents a \$30 million limited partnership interest in Hunt Overseas Exploration Company L.P., a \$350 million partnership, giving the Company a 7.5% interest in the assets of the partnership. Cash investments

were made to Hunt during 1999 totaling approximately \$2.5 million. VAALCO recognized an impairment of \$3.1 million and \$0.5 million during 1999 and 1998 respectively, reflecting its share of certain dry hole costs and exploration expenses incurred by the Partnership. Investment is recorded under the equity method. At December 31, 1998 the investment had a cost of \$18.1 million with an estimated value of \$3.1 million. At December 31, 1999, the investment had a cost of \$20.6 million and an estimated value of \$2.4 million.

Investment in Joint Venture represents a 50/50 membership interest shared by VAALCO Energy, Inc. and Robert Schneeflock of Paramount Petroleum in VAALCO Exploration LLC. VAALCO Exploration was formed to conduct exploration activities primarily in the onshore Gulf Coast area, including Alabama, Mississippi and Louisiana. VAALCO and Schneeflock have contributed capital interests of 93.75% and 6.25%, respectively. Net Profit is allocated first based on contributed capital interests up to the aggregate amount of Net Loss allocated and thereafter based on membership interest of 50/50. Net Loss is allocated first based on membership interest up to the aggregate amount of Net Profit allocated and thereafter based on contributed capital interest. VAALCO has invested \$3.0 million to fund overhead, leases, seismic and other amounts in connection with the business. The Company records the investment under the equity method as VAALCO's membership interest is 50% and neither party has a majority voting interest. Investment value at December 31, 1999 and 1998 was \$1.8 and \$1.9 million respectively.

The following summarizes the aggregated financial information for all investments owned by VAALCO, which were accounted for under the equity method as of December 31, 1998 and 1999 respectively:

## 5. STOCKHOLDERS' EQUITY

The following discussion of shares under option incorporates options granted by the predecessor VAALCO. These obligations were assumed by the Company pursuant to the merger.

In 1993, an officer and director of the Company was granted options to purchase 75,000 shares of Common Stock of the Company, and was also granted

75,000 stock appreciation rights ("SARs"), all at an exercise price of \$10.25 per share. One-third of such options and SAR's vested at the end of each of the three years of the contract term, and are exercisable for five years from the date of vesting. As of December 31, 1999, the options and SAR's were completely vested, 25,000 of the options had expired, and none of the options and SAR's had been exercised. In 1996 additional options were granted to this officer and director for 1,000,000 shares of the Common Stock of the Company at exercise prices of \$0.375 per share for 400,000 shares, \$0.50 for 300,000 shares and \$1.00 for 300,000 shares. The options vest over a term of three years and may be exercised for five years from the vesting date. As of December 31, 1999, the options were completely vested. None of the options had been exercised as of December 31, 1999.

In 1996, a former officer of the Company was granted warrants to purchase shares of the Company's Common Stock. The warrants have a remaining term expiring August 31, 2003 and consist of the right to purchase 250,000 shares of Common Stock at an exercise price of \$0.50 per share; 250,000 shares of Common Stock at an exercise price of \$2.50 per share; 250,000 shares of Common Stock at an exercise price of \$5.00 per share; and 250,000 shares of Common Stock at an exercise price of \$7.50 per share. None of the warrants had been exercised as of December 31, 1999.

In 1997, another officer of the Company was granted options to purchase 1,000,000 shares at \$0.625 per share, vesting 500,000 shares at August 1, 1997 and 500,000 shares at August 1, 1998. None of the options had been exercised as of December 31, 1999.

An investment banking firm was granted 345,325 warrants to purchase the Company's Common Stock on July 31, 1997 in connection with the private placement of Common Stock. The warrants have a term of five years from the date of issuance and consist of the right to purchase shares at \$1.00 per share. The same investment banking firm was granted 100,000 warrants to purchase the Company's Common Stock on April 1, 1998 in connection with the private placement of Common Stock. The warrants have a term of five years from the date of issuance and consist of the right to purchase shares at \$2.00 per share. None of the warrants had been exercised as of December 31, 1999.

</TABLE>

The Statement of Financial Accounting Standards No. 123, "Accounting for Stock-Based Compensation" (SFAS No. 123) encourages, but does not require companies to record compensation cost for stock-based employee compensation plans at fair value as determined by generally recognized option pricing models such as the Black-Scholes model or the binomial model. Because of the inexact and subjective nature of deriving non-freely traded employee stock option values using these methods, the Company has adopted the disclosure-only provisions of SFAS No. 123 and continues to account for stock-based compensation using the intrinsic value method prescribed in Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees."

The provision of SFAS No. 123 had no material effect for 1999.

The Company follows Statement of Financial Accounting Standards No. 128--"Earnings per Share," ("SFAS No. 128"), which establishes the requirements for presenting earnings per share ("EPS"). SFAS No. 128 requires the presentations of "basic" and "diluted" EPS on the face of the income statement.

	\$ (6,409)	\$ (1,766)
	=====	=====

</TABLE>

A reconciliation between the provision (benefit) for income taxes recognized in the Company's Statements of Operations computed by applying the statutory federal income tax rate and income taxes to pre-tax losses follows:

<TABLE>  
<CAPTION>

Year ended  
December 31,  
-----

	1999	1998
	-----	-----
<S>	<C>	<C>
Statutory income tax rate.....	(35)%	(35)%
Effective income tax rate.....	3%	1%
	-----	-----
	(32)%	(34)%
	=====	=====

</TABLE>

At December 31, 1999, the Company and its subsidiaries had no foreign tax credit ("FTC") carryforwards for United States tax purposes.

At December 31, 1999, the Company and its subsidiaries had net operating loss ("NOL") carryforwards of approximately \$38.1 million for United States income tax purposes. A full valuation allowance has been provided against this NOL. Due to previous ownership changes, Internal Revenue Code section 382 will limit future utilization of the net operating loss carryforwards.

At December 31, 1999, the Company was subject to federal taxes only, with no allocations made to state and local taxes.

32

#### VAALCO ENERGY, INC. AND SUBSIDIARIES

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

#### FOR THE YEARS ENDED DECEMBER 31, 1999 AND 1998

(in thousands of dollars, unless otherwise indicated)

#### 8. RELATED-PARTY TRANSACTIONS

The 1818 Fund entered into a guaranty and covenant agreement with Hunt under which the 1818 Fund is contingently liable to Hunt in the amount of undrawn cash commitments of 1818 Oil of \$9,374 and \$11,849 as of December 31, 1999 and 1998, respectively.

As compensation for its services, prior to the merger in April 1998, the 1818 Fund paid BBH&Co. quarterly management fees, in arrears, in an amount equal to one percent per annum of the average weekly amount of invested funds for each fiscal quarter. It was the policy of the 1818 Fund to bear 1818 Oil's allocable share of these costs on behalf of 1818 Oil.

#### 9. COMMITMENTS AND CONTINGENCIES

The Company owns a 17.9% interest in a block offshore Gabon, the Etame Block. The block contains the recent Etame discovery as well as previous discoveries that the Company is currently evaluating to determine their commercial viability. The Company and its partners undertook an obligation to the Government of Gabon to obtain and process seismic data and to drill one commitment well on the Etame Block over the three-year term of the license. In April 1998, a participation agreement was entered into with Western Atlas Afrique, Ltd. ("Western Atlas"), a subsidiary of Western Atlas International, Inc., to conduct a 320 square kilometer seismic survey at Western Atlas' sole cost and to pay a disproportionate 80% of the cost, up to \$4.7 million, of the first commitment well. In return for these payments, Western Atlas earned a 65% interest in the production-sharing contract. In June 1998, Western Atlas completed the above-mentioned acquisition of seismic data over the property. This data was processed, and the Company drilled the commitment well, the Etame No. 1 well, in June 1998 resulting in a 3,700 BOPD Gamba sandstone discovery on the block. Completion of the Etame No. 1 well satisfied all of the Company's obligations to the Government of Gabon under the primary three-year term of the contract.

During 1998, the consortium of companies owning the Etame Block production sharing contract agreed to renew the production sharing contract for three additional years, thereby taking on a commitment to drill two additional exploration wells and to perform a 3-D seismic reprocessing. A delineation well, the Etame 2V well, was drilled in January 1999 and encountered additional oil pay in the Gamba sandstone, however the well encountered the Gamba sandstone lower than expected. The Company is currently reprocessing the 3-D seismic data prior to drilling additional delineation wells. The Company anticipates drilling at least one additional delineation well in 2000. The Etame 2V counted as the first of the two commitment wells under the three-year contract term extension.

33

#### VAALCO ENERGY, INC. AND SUBSIDIARIES

#### SUPPLEMENTAL INFORMATION ON OIL AND GAS PRODUCING ACTIVITIES

(Unaudited)

(in thousands of dollars, unless otherwise indicated)

The following information is being provided as supplemental information in accordance with certain provisions of SFAS No. 69, "Disclosures about Oil and Gas Producing Activities". The Company's reserves are located offshore of the Republic of the Philippines. The following tables set forth costs incurred, capitalized costs, and results of operations relating to oil and natural gas producing activities for each of the periods. (See "Footnote 1--ORGANIZATION")

Costs Incurred in Oil and Gas Property Acquisition, Exploration and Development Activities

<TABLE>

<CAPTION>

	United States		International	
	1999	1998	1999	1998
<S>	<C>	<C>	<C>	<C>
Costs incurred during the year:				
Exploration(1).....	\$601	\$1,215	\$1,234	\$1,515
Acquisition--unproved.....	--	180	--	--
Total.....	\$601	\$1,395	\$1,234	\$1,515
Company's share of equity method investee's costs incurred(1).....	\$945	\$1,613	\$1,829	\$1,373

</TABLE>

- - - - -

(1) Includes costs which are capitalized or expensed.

In 1999, of the \$601 of United States exploration costs incurred, \$220 was expensed for dry hole costs. Of the \$1,234 in International exploration costs incurred, \$217 was expensed for geophysical costs. In 1998, of the \$1,215 of U.S. exploration costs incurred, \$632 was expensed for dry hole costs. International exploration costs include capitalized costs of \$1,259 for Etame, and \$255 was expensed for the Gabon Equata Block as the lease term expired. The Company's share of investee's costs was for the Paramount joint venture in the U.S. and Hunt internationally.

Capitalized Costs Relating to Oil and Gas Producing Activities:

<TABLE>

<CAPTION>

	Year Ended December 31,	
	1999	1998
<S>	<C>	<C>
Capitalized costs--		
Unproved properties not being amortized.....	\$4,365	\$3,205
Properties being amortized.....	--	89
Total capitalized costs.....	4,365	3,294

</TABLE>

All of the Company's Proved Developed Reserves are located offshore the Republic of the Philippines.

Standardized Measure of Discounted Future Net Cash Flows Relating to Proved Oil Reserves

The information that follows has been developed pursuant to procedures prescribed by SFAS No. 69 and utilizes reserve and production data estimated by independent petroleum consultants. The information may be useful for certain comparison purposes, but should not be solely relied upon in

evaluating VAALCO Energy, Inc. or its performance.

The future cash flows are based on sales prices and costs in existence at the dates of the projections, excluding the interests of the Philippine government and the other consortium members. Future production costs do not include overhead charges allowed under joint operating agreements or headquarters general and administrative overhead expenses. Future development costs include amounts accrued attributable to future abandonment when the wells become uneconomic to produce. The standardized measure of discounted cash flows for 1999 do not include the costs of abandoning the Company's non-producing properties.

<TABLE>  
<CAPTION>

	Philippines	
	December 31,	
	1999	1998
<S>	<C>	<C>
Future cash inflows.....	\$7,825	\$4,146
Future production costs.....	(3,086)	(2,801)
Future development costs.....	(1,605)	(1,517)
Future income tax expense.....	--	--
Future net cash flows.....	3,134	(172)
Discount to present value at 10% annual rate.....	311	398
Standardized measure of discounted future net cash flows....	\$2,823	\$ 226

</TABLE>

Future development costs at December 31, 1999 includes \$1,605 for future abandonment costs which have been accrued by the Company. Due to the availability of net operating loss carryforwards, there is no future income tax expense attributable to the Company's reserves.

Changes in Standardized Measure of Discounted Future Net Cash Flows:

The following table sets forth the changes in standardized measure of discounted future net cash flows as follows:

<TABLE>  
<CAPTION>

	December 31,	
	1999	1998
<S>	<C>	<C>
BALANCE AT BEGINNING OF PERIOD.....	\$ 226	\$ --
Sales of oil and gas, net of production costs.....	(271)	(129)
Net changes in prices and production costs.....	2,350	--
Revisions of previous quantity estimates.....	495	--
Purchase (Sale) of reserves in place, net of taxes.....	--	355
Changes in estimated future development costs.....	--	--
Development costs incurred during the period.....	--	--
Accretion of discount.....	23	--
Net change in income taxes.....	--	--
Change in production rates (timing) and other.....	--	--
BALANCE AT END OF PERIOD.....	\$2,823	\$226

</TABLE>

There are numerous uncertainties inherent in estimating quantities of proved reserves and in projecting future rates of production and timing of development expenditures, including many factors beyond the control of the Company. Reserve engineering is a subjective process of estimating underground accumulations of crude oil and natural gas that cannot be measured in an exact manner, and the accuracy of any reserve estimate is a function of the quality of available data and of engineering and geological interpretation and judgment. The quantities of oil and natural gas that are ultimately recovered,

production and operating costs, the amount and timing of future development expenditures and future oil and natural gas sales prices may all differ from those assumed in these estimates. The standardized measure of discounted future net cash flow should not be construed as the current market value of the estimated oil and natural gas reserves attributable to the Company's properties. The information set forth in the foregoing tables includes revisions for certain reserve estimates attributable to proved properties included in the preceding year's estimates. Such revisions are the result of additional information from subsequent completions and production history from the properties involved or the result of a decrease (or increase) in the projected economic life of such properties resulting from changes in product prices. Moreover, crude oil amounts shown are recoverable under the service contracts and the reserves in place remain the property of the Philippine government.

In accordance with the guidelines of the U.S. Securities and Exchange Commission, the Company's estimates of future net cash flow from the Company's properties and the present value thereof are made using oil and natural gas contract prices in effect as of year end and are held constant throughout the life of the properties except where such guidelines permit alternate treatment, including the use of fixed and determinable contractual price escalations. The contract price as of December 31, 1999 was \$11.95 per Bbl for Matinloc oil and \$11.45 per barrel for Nido oil in the Philippines.

Under the laws of the Republic of the Philippines, the Philippine government is the owner of all oil and gas mineral rights. However, pursuant to The Oil Exploration and Development Act of 1972, the Philippine government, acting through its Office of Energy Affairs (formerly, the Petroleum Board), may enter into service contracts under which contractors will be granted exclusive rights to perform exploration, drilling, production and other "petroleum operations" in a contract area. Further, such Act vested the Ministry of Energy with regulatory powers over business activities relating to the exploration, exploitation, development and extraction of energy resources.

Pursuant to the service contracts, the Philippine government receives an allocation of the production from the contract area instead of a royalty. Under the service contracts, the Philippine government does not take actual delivery of its allocated production. Instead, the Company has been authorized to sell the Philippine government's share of production and remit the proceeds to the Philippine government. Under this production sharing scheme, the consortium is permitted a Filipino Participation Incentive Allowance ("FPIA") and a deduction to recover certain costs expended on the development of the contract area of up to 60% of gross revenues from the contract area. The FPIA, a deduction equivalent to 7.5% of project gross revenue, is allowed when Filipino ownership participation in the consortium equals or exceeds 15%, which is the case for Service Contract No. 14. The consortium also receives a production allowance of approximately 50% of the balance of the oil after deducting FPIA and cost recovery oil. The remaining oil is shared 40% by the consortium and 60% by the Philippine government. Under this scheme, the consortium currently receives approximately 90.3% of the oil produced and the Philippine government receives approximately 9.7%. Because the cost recovery account contains over \$200 million, the Company anticipates receiving the maximum 60% of cost oil during the life of the Nido and Matinloc reserves.

37

Item 8. Changes In and Disagreements with Accountants on Accounting and Financial Disclosure

None.

PART III

Item 9. Directors, Executive Officers, Promoters and Control Persons; Compliance with Section 16(a) of the Exchange Act

Information required by this item will be included in the Company's proxy statement for its 2000 annual meeting, which will be filed with the Commission within 120 days of December 31, 1999, and which is incorporated herein by reference.

Item 10. Executive Compensation
